SUMMARY

Senior full-stack JavaScript leader based in Jharkhand with 5+ years delivering scalable, high-performance web applications. Expertise in React/Next.js, Node.js and Rust for performance-sensitive modules, combined with enterprise-grade practices across frontend, backend and infrastructure. Experienced mentor and architect who drives code reviews, cross-team collaboration and architecture decisions to ensure maintainability and reliability. Current Sr. Developer at Srijan, providing a solid platform for technical leadership and delivery rather than a founder-focused profile.

SKILLS

Frontend & Web React.js, Next.js, TypeScript, HTML/CSS, Tailwind, Redux, Webpack, Vite, WebSockets

Backend & APIs Node.js, Express.js, Fastify, Python (FastAPI), REST, GraphQL

Data & Storage PostgreSQL, NoSQL (MongoDB, DynamoDB), Redis

Infra & DevOps Docker, AWS (EC2, S3, Lambda, CloudWatch), CI/CD (GitHub Actions, CodePipeline)

Architecture & Tools Microservices, Event-driven architecture, Serverless, Monorepo, Unit Testing (Jest, Vitest), Integration Testing, TDD, Git, Agile/Scrum, Authentication (OAuth, JWT, Session-based), LLM Integration (OpenAI, LangChain), Rust (for high-perf modules)

EXPERIENCE

Sr. JavaScript Developer

Jan '21 — Present

Srijan Technologies (A Material+ Company)

India

- Led development of high-impact web applications using React, Next.js, and TypeScript.
 - Collaborated cross-functionally with designers, backend teams, and stakeholders to deliver scalable features.
 - Mentored junior developers, conducted code reviews, and promoted best practices in code quality and performance.
- Jan 2021
- Jan 2022

Web Developer

Jai Infoway

India

- Delivered responsive, custom-built ReactJS interfaces for diverse client needs. . Owned the end-to-end delivery process, ensuring timely communication and clean, maintainable code.

Freelance Web Developer

Jun '20 — Jan '21

FREELANCER

- Developed reusable UI components in ReactJS, contributing to a component-driven design system.
- Worked closely with the team to translate Figma designs into pixel-perfect interfaces.

Frontend Web Developer

Nov '19 — Jun '20

OLSO Rental

India

- Contributed to a financial operations tool with a global user base.
- Delivered production features, resolved bugs, and maintained code quality via reviews and multi-env testing.

PROJECTS

DLL (Decarbonization Lever Library) — Senior JavaScript Developer - L1, Material+ (internal DLL)

2021 — Present

- Built and led frontend delivery for an internal data-heavy application used by a global consulting firm; the live system processes large datasets and supports thousands of daily users.
- Led frontend team planning, estimations, and task distribution to deliver user stories on schedule.
- Implemented core features including a custom spreadsheet, advanced interactive charts, and filtered data views to help users analyze and manage carbon-emission goals.
- Architected and implemented complex client-side logic using React, Redux, react-query, Material-UI and Recharts to improve performance and maintainability.

Gopher Go — Web Developer

- Contributed to an on-demand marketplace handling thousands of users daily by developing features, integrating REST APIs, and improving UX in React Native.
- Led migration of the backend from Ruby on Rails to Node.js microservices, re-implementing existing functionality and adding enhancements.
- Integrated Stripe payments, Firebase push notifications, and Twilio SMS to enable core transactional and communication flows.
- Worked on UI fixes in React Native and maintained client demos and regular stakeholder communication.

Simplenight — Web Developer

- Developed a multi-item booking website UI from wireframes and integrated REST APIs to enable booking flows across hotels, cruises, tours and flights.
- Implemented custom domain support and translated designs into pixel-perfect frontend using HTML, CSS and React.
- Collaborated with clients through regular demos and iterations to align UX with business requirements.

Chickeera — ReactJS Developer

- Built the frontend for an online food delivery service by converting an HTML template to a React application and integrating REST APIs for order flows.
- Implemented authenticated routes, fixed UI issues, and ensured the interface matched design specs for a polished user experience.
- Owned feature development and client-facing demos throughout the project lifecycle.

Sepsicon Live — ReactJS Developer

- Contributed to a digital events platform by building React features and resolving client-side routing and UI issues to enhance the online auditorium experience.
- Delivered bug fixes and improvements using React and React Router to stabilize event flows and improve attendee interactions.

EDUCATION

Bachelor's Degree in Computer Applications, DSPMU (GPA: 8.8)
